

PATTERNS AND TEXTURES

19

A pattern is made up of shapes and lines,
Some can be bold others are fine.
Colors are mixed to make them just right,
Like curtains hung up in the window at night.

A texture describes the way something feels,
Like bark on a tree or different fruit peels.
Velvet is smooth and brick is rough,
An elephant's skin is lumpy and tough!

Draw one of the pairs in here.

**Here is a list of words that describe textures. Here is a list of objects that have textures.
Match the texture to the object by drawing a line connecting the two boxes.**

Rough

Silk

Smooth

Rabbit

Woven

Chip packet

Pitted

Hedgehog

Spiky

Orange peel

Furry

Tree bark

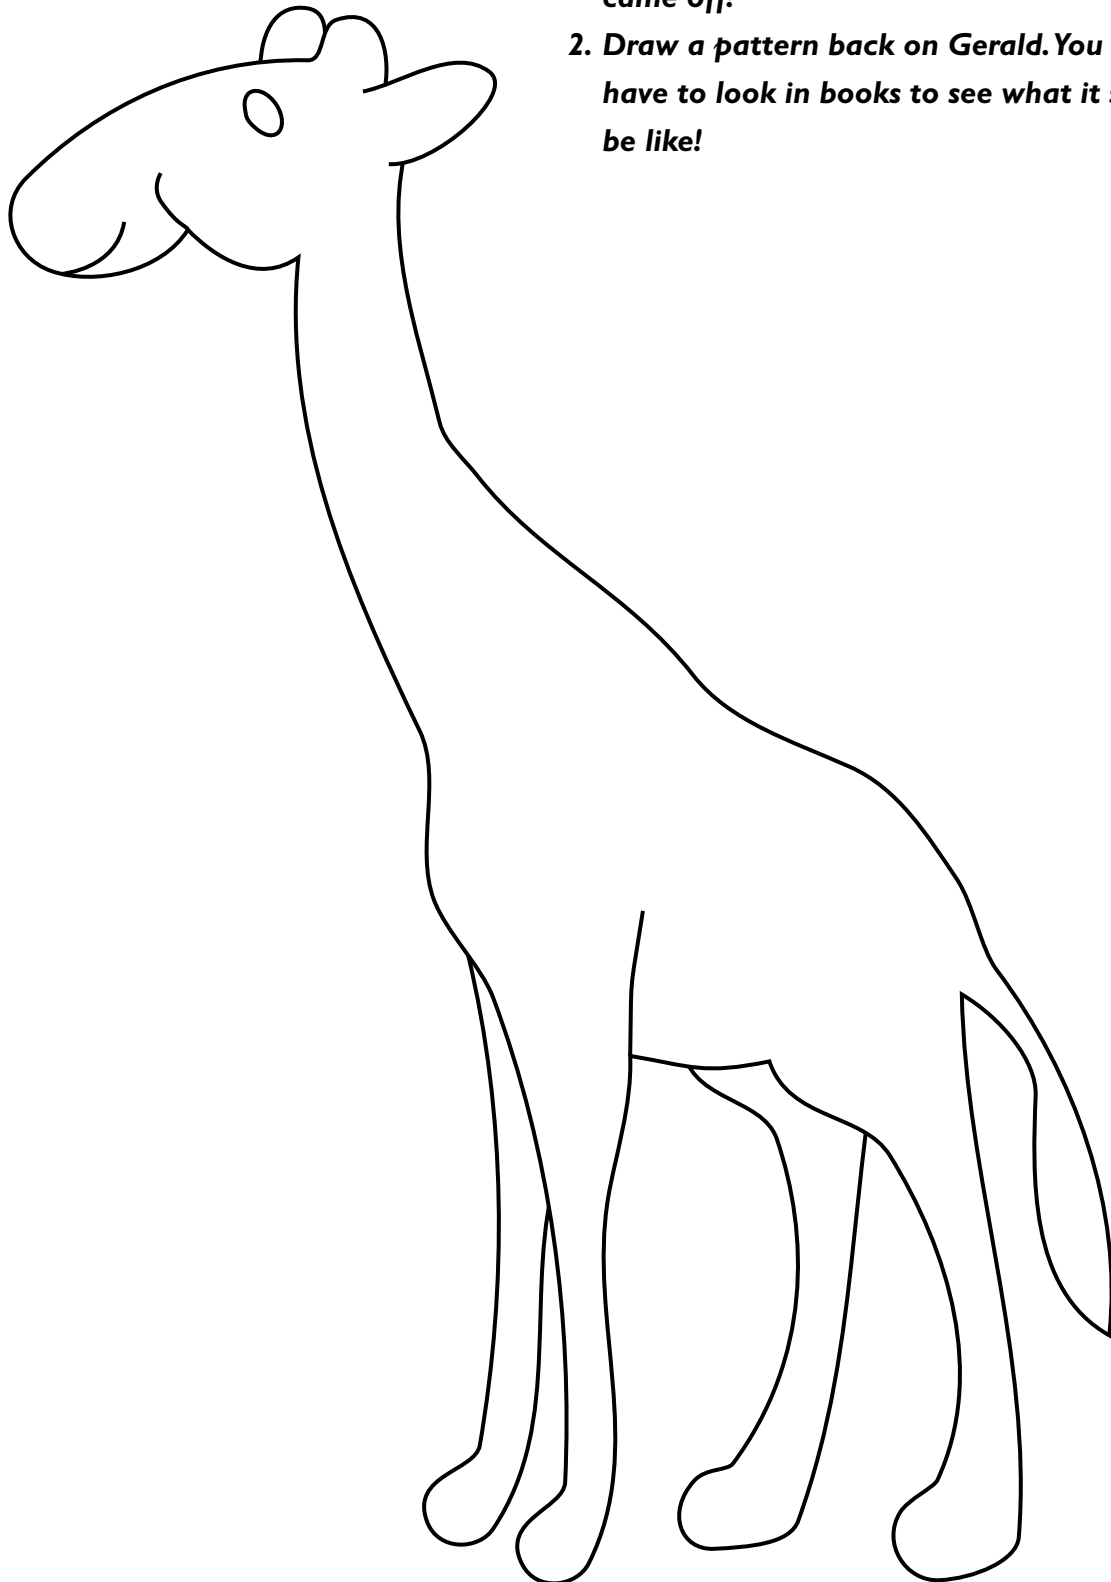

Crinkly

Rug

Artists create patterns and textures using lines and shapes. This makes their pictures more interesting.

A pattern for Gerald.

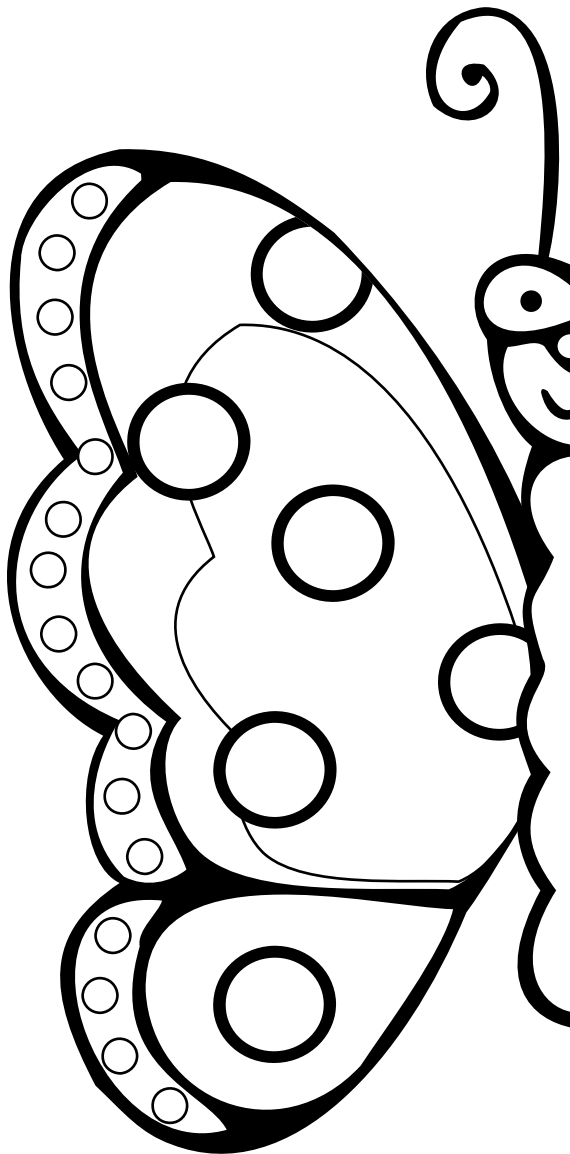

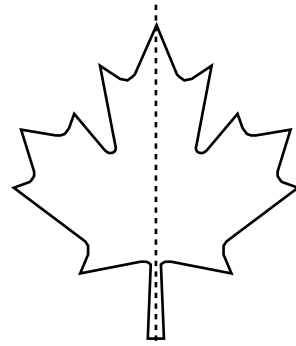

- 1. Gerald the giraffe usually has a pattern on his fur but he got caught in the rain and it came off!**
- 2. Draw a pattern back on Gerald. You might have to look in books to see what it should be like!**

Symmetry is when an object has exactly the same parts facing each other. Mother nature made many beautiful symmetrical things for us. Today we are going to look at the butterfly.

- 1. Half of the butterfly is on the page. Draw the other half exactly the same.**
- 2. Color in both sides exactly the same.**

A symmetrical leaf.

FACES - Expressions

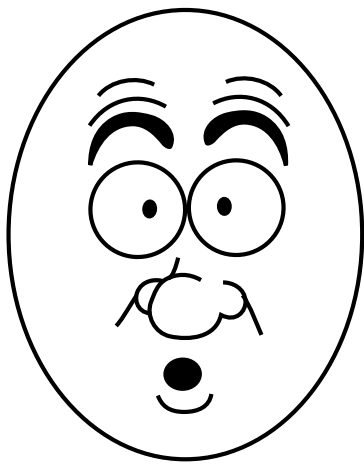

Faces can tell us so many things. If a person is sad it shows on their face. If they are happy you are sure to know!

Draw in the faces in the other four heads.

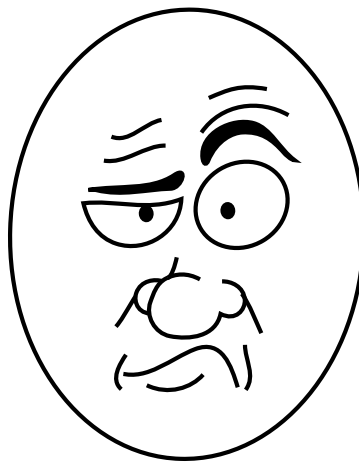

Draw in pencil first until you are happy that it is correct. Then go over in felt pen.

Say some of these words to the person next to you and see if they can make a face that matches the word.

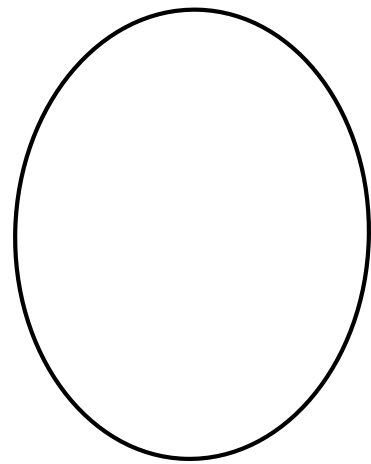

If you get stuck ask your friend to make the face for you. It will help you see how to draw the parts of the face.

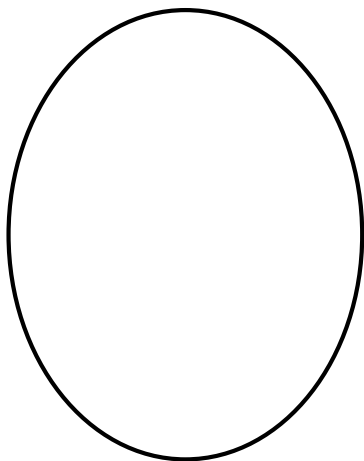

Surprised

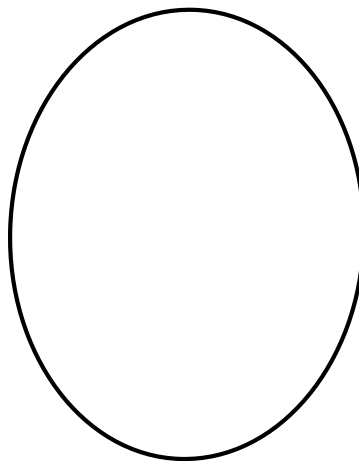

Doubtful

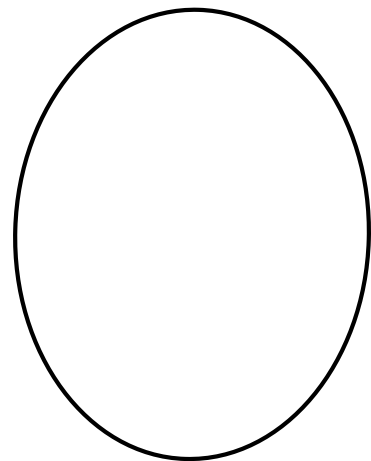

Happy

Sad

Laughing

Frowning
